VOL. 12: NO. 588. CHAUVIN, ALBERTA

WEDNESDAY, SEPTEMBER 23rd 1925

\$2.00 per year in advance: 5c per copy

THANKS & APPRECIATION

We have been greatly encouraged by, and would like to thank those of our subscribers who since the death of Mr. D'Albertanson, have called in and paid their subscriptions, or made arrangements for doing so after the threshing is over, thus assuring us of their support in our endeavor to "carry on."

Mrs. A. D'Albertanson,
Leonard D'Albertanson

R. M. MANITOU LAKE MEETING MINUTES

Minutes of meeting of the Council of Manitou Lake Rural Municipality was held in the office at Marsden, Sask., on the 9th day of September 1925.

Present: Reeve Berry; Councillors Rogers, Wells, Lawson, Smith, Dutton and Bradley. (All)

The minutes of the last meeting were read and passed after a slight addition and the changing of the date of this meeting.

Marsden School: Two delegations waited upon the Council with petitions regarding the site of the Marsden school. The petitions and pleas of the petitioners were fully considered and after some discussion the motion was put that the Marsden school site be on the three acres west of block four of the Hamlet of Marsden. Carried. For, Rogers, Lawson, Dutton and Bradley; against, Berry, Wells, and Smith.

Road Fencing: J. T. Vine was granted a lease of the roadway East of the SE 14-44-28w3rd.

Geo. Haskins was granted a lease of the roadway east of section 35-46-26w3rd provided that he place gates at either end with tie posts at both sides of each gate.

Re C.P.R. Crossing into Marsden: It was resolved that the council accept the proposal of the C.P.R. to release the permanent right of the crossing at the N.W. Corner of the N.W. 35-44-27w3 but that they also very strongly recommend that the crossing remain as a private crossing to be maintained at municipal expense. The above release to be allowed in exchange for a permanent crossing just east of the U.G.G. Elevator site at Marsden. Crd.

Buildings: It was moved that an additional bedroom be built to the municipal buildings. Crd.

Divisions: The following divisions were ordered paid at the following rates:

S.E. 17-44-27w3 2.71 acres at \$15. per acre. In this connection the council also agree that if the land is fenced they will place a cattle pass under their grade to allow cattle to water.

SE 19-46-26w3 .67 acres at \$10. per acre. SW 15-44-27w3 .91 acres at \$15. per acre. N.W. 16-45-27w3 1.73 acres at 15. per acre.

Moved to adjourn. Crd. The next meeting will be held in the office on the 12th day of October 1925.

HISTORY OF NATURAL GAS INDUSTRY SINCE DISCOVERY TO PRESENT

A Few Excerpts from Address of
William B. Way, Formerly Secretary of the Natural Gas
Association of America

"Gas, as so known, had a peculiar origin. John Baptist Van Helmont of Brussels, digressing from his experiments and endeavors to change the baser metals into gold, which had been the practice of alchemists for centuries, was led strangely to accidental discovery of artificial gas, now better known as manufactured gas, so named principally to distinguish it from natural gas, such as we, in our own industry, are dealing with. About the year of 1609 he discovered in his experiments with fuels, that they gave up what he described as a "wild spirit", and he said in his writings, "This spirit, up to the present time unknown, not susceptible of being confined to vessels, nor capable of being produced in a visible body, I call 'Gas'. It was nearly two hundred years later that the first practical steps were taken to harness this elusive spirit and to put it to use. So much for where we got the name.

But away before this in the early ages, the ages of superstition (Continued on page seven)

FOWL SUPPER AND BAZAAR AT RIBSTONE

The ladies of the Auxiliary will hold their annual fowl supper, bazaar and fish pond, on the 15th day of October in the Municipal Hall Ribstone. Admittance will be 50c. Everybody cordially invited. We promise to try and give you a very pleasant evening.

RIBSTONE W. I. NOTES

The Ribstone W. I. will hold a sale of Home Cooking and serve Afternoon Tea in the Municipal Hall. Ribstone Saturday October 3rd 1925, from 3 o'clock p.m. to 6 o'clock p.m.

The next meeting of the Ribstone W. I. will be held in the Municipal Hall Ribstone Wednesday, September 30th. All members are requested to attend.

HARVESER ARRESTED FOR HOUSEBREAKING

Guy B. Allen, alias George Peacock from New Brunswick was brought in to Edmonton by Corporal Moses of the A.P.P. on Thursday night after being committed for trial by A. E. Keith of Chauvin, on two charges of housebreaking and entering, in the Chauvin District

Call at Saker's on Saturday and see the fine display of women's wear by Miss. M. E. Donovan.

LOCAL NEWS OF INTEREST

Threshing returns now coming rigs in the Killarney district could seem to show that this is not one of those "off years" where crops are concerned.

From an 80 acre field of summer fallow L. A. Cayford threshed 2700 bushels, the adjacent C. P. R. land belonging to H. Young was as fully productive while threshing results on the McEwen farm are about equally satisfactory. L. Larouche had an average of 27 bushels from his summer-fallow. The summer-fallow on the T. Armour farm went 35 bushels to the acre, while T. Lablanc had 2700 bushels from 100 acres, breaking and summer-fallow. Further along on the A. McAskill farm there was a gratifying return of 1200 bushels from 37 acres and E. Boulanger had an average all over around 22 bushels. Other crops still unthreshed look capable of a like productiveness, and all in all, while these returns do not represent the average yield, all over, yet there is more cause for satisfaction than complaint.

E. Stockton professional well-driller who drilled a number of deep wells for farmers in this district last summer, and gave good satisfaction, has just finished a 280 foot well on the farm of Olaf Arneson in the Greenmeadows district. Water in this well comes up to 20 feet from the top, and just escaped being a "flowing well, apparently. Mr. Stockton is now engaged drilling for Messrs Parcels and Foxwell on their land south of the track.

Mrs. H. N. Freeman who took charge of Killarney school for Mr. G. Saul until threshing was completed on his farm is still teaching the "young idea to shoot" in the Killarney district.

J. P. Hepburn (Happy) former a business man of Chauvin has been visiting friends in the district during the past week.

Mr. Rolf, of Minneapolis, who has been in the district for some time looking after his crop, re-was accompanied by omeone asth turned home last week, accompanied by Mr. Gustave Johnson.

We are sorry to report that Miss P. McLeod of the local bank is very ill in the Royal Alexander hospital, Edmonton. We wish her a speedy recovery.

Threshing, which has been delayed during the past week, owing to the rain, started off in full swing Monday morning, with greatly improved weather conditions.

The four year old son of A. Clifford of Ribstone who was taken to Provost hospital on advice of Dr Folkins, was on Monday op-

(Continued on page five)

MEMORIAL CLOCK TOWER UNVEILED AT WAINWRIGHT

Ideal weather prevailed for the unveiling of Wainwright's memorial clock tower, which took place Sunday afternoon

The Walter Musson Chapter I. O. D. E., through the indefatigable efforts of their members, carried through a program of financing with the memory of what it should so fittingly represent always in view, with the result that there stands a monumental clock tower, at the intersection of Main street and Second avenue, a work of stone cutter's art, admired by all that have viewed it.

It is built of cobble stones, gathered by willing hands from field and prairie and encasing a brass tablet, bearing the names of thirty-nine from this district who gave up their lives in the great war.

When the band had escorted the school children, lead by representatives of the Boy Scouts bearing the colors and the large procession or returned veterans under Capt. MacKenzie had paraded into place, a mounted guard of honor, in charge of Lieut. H. tor Major-Gen. W. A. Griesbach, D.S.O., C.B., C.M.G., to the raised platform where representative members of the I. O. D. E. Chairman Pawling, Rev. Mr. Love, together with the mayor and council, were seated.

The Day's Program

The program, as carried thru, consisted of the opening hymn, "O Canada," sung by the large gathering, a prayer by Rev. Mr. Love, and address by Mayor Elcork, stressing the fitting work done without ostentation by the ladies of the I. O. D. E. towards signally memorializing those who gave their lives in the great conflict.

The reply to the mayor's, address was made by Mrs. Adelina Lasell, regent I. O. D. E.

The featured address of the day was that given by Senator Major-Gen. W. A. Griesbach, of Edmonton, who dwelt at some length on the causes leading up to the great war, and signally depicted

(Continued on next column)

BROKE HIS LEG

Last Friday night, while helping to move the threshing outfit with which he was working, Howard Peterson, met with a painful accident, which will lay him up for the rest of the season. The outfit was moving from the Coal Springs district to the A. G. Walker farm north of Irma. While coming up the coulee hill, the engine stalled and in cranking it Mr. Peterson slipped and in some way fractured his leg near the ankle. As soon as the accident happened, Howard was moved to the home of his parents placed on a bundle wagon and re-at Irma, where Dr. Stoner was called to attend him.

ing that though every effort had been made to obviate the necessity of the conflict that further overtures, rather than enhancing the status of an empire or the world, would have shown in its wake greater losses in matters of maintaining a future safe democracy and national self esteem, even than that caused by the conflict

With a few well chosen words, General Griesbach unveiled the dedicatory prayer by Rev. A. memorial tablet, followed by a Love. A one minute silence was observed, followed by the sounding of "Last Post," by Bugler Frank Stott.

Wreaths were placed at the base of the tower by the school children. Floral decorations were also placed at the foot of the monument by representatives from the Odd Fellows, Rebeccas, Masons, Eastern Star, town of Wainwright, and many individuals.

A hymn, "O God Our Help In Ages Past," was then sung, followed by a fitting address by Capt. G. L. Hudson, representing the G. W. V. A.

A benediction by Rev. A. I. placed the closing proceedings.

C. N. R. WILL BUY PRODUCT OF B. P. 3b

Fuel oil from the new No. 3B well at Wainwright will be sold to the C. N. R. and loading of tank cars will commence at once. It appears that the shipments of oil will depend on the rate that the cars are placed at the loading point by the railway.

Director Tom Sugars, of the British Petroleum company, arrived in Wainwright on Wednesday and confirmed the report that oil will be sold to the railway. This proves that the new well is a commercial producer, while it is definitely stated that the oil is of improved quality.

Mr. Sugar states that he has no information as to what purpose the oil will be used by the C. N. R. while any contract for an assured supply cannot be taken up until there is a greater production. The new well could fill three tank cars per week, and it is not yet running at full capacity.

"Tests that have been made show that the oil from No. 3B well is a good crude and runs 29.2 Beaume, showing it to be the best oil yet produced in the field," said Mr. Sugars. "While there has been some negotiations as to selling the Imperial company nothing whatever has come of it up to the present time.

Selling Company Now Denied
"Nothing but wild reports," was what Mr. Sugar had to say about the Dutch Shell, Union and Imperial companies were seeking to buy the interests of the British Petroleum company.

Development plans were discussed by the B. P. directors at recent meetings at Vancouver, while the marketing prospects

Our Short Story.

THE BURMESE BUDDHA

By Beatrice Heron-Maxwell
In Wide World Magazine

"I vouch absolutely for the truth of this narrative," writes Mrs. Heron-Maxwell. For obvious reasons, however, the names of the parties have been changed in the text of the story.

The ruined little shrine, neglected and covered with vegetation, was on the Burmese hill side, and the long climb up to it had brought a rosy flush to Mrs. Verulam's cheeks.

Her husband glanced at her admiringly. "You might be in England, Maurie," he said, "you've got your home color back again."

She smiled happily. "There's some sort of atmosphere up here that exhilarates me," she told him. "Perhaps it's this queer little shrine. I feel good and happy!"

"Capital," commented Major Verulam, with an answering smile. "Long may you remain so!"

Maurie sat down on a heap of time-worn stones that had evidently been the steps of an altar.

"Let's rest here, Lance, and drink in this perfect view," she said.

Below them the hill was clothed with tropical foliage, creepers hanging from tree to tree, while here and there a dull red pagoda roof or the brown of a lalang-grass thatched bungalow broke undulating green.

Lower down came a stretch of rice fields, and beyond them the river, with the little government launch waiting to take them back to the cantonment where the Major's battery was temporarily stationed.

Glancing curiously around her, Maurie suddenly chanced on something half hidden under the debris. She went to examine it, and presently dragged out a small figure from a tangle of creeper which covered it.

"A little Gotama!" she exclaimed. "A Buddha, I suppose. Look, Lance! Isn't he a darling?"

The figure was about a foot high, delicately carved in white alabaster, picked out with black and ornamented with faded gold leaf. The face was that of a typical Buddha, and appeared to gaze at her benignly. It was obviously very ancient.

Mrs. Verulam stood the figure down and regarded it meditatively. "I wonder!" she said musingly. "I wonder!"

"You wonder what?" inquired Verulam.

"Whether Buddha, after he fell from his pedestal, chose to lie there hidden and wait for—"

"For you?" Her husband was lazily amused.

"For me—yes! I believe he meant to wait for me! I'm going to take him, Lance."

"Better not."

"But I want to. I feel as if I had been sent here on purpose. I'll give him a little shrine all to himself and put flowers before him in that Benares bowl you gave me."

"Never tamper with strange gods," Varulam counselled, rather gravely. But his wife was determined to have her own way. Picking up the figure, she concealed it in the folds of her dust cloak and then, taking out a few

rupees from her purse, tucked them into the hollow where Buddha had rested.

"If the natives know he was here—" she began.

"You bet they know!" her husband interrupted.

"They will find the money and be consoled," Mrs. Verulam concluded. "They can buy a new Gotama or spend it as they like."

Again the Major tried to dissuade her, a hint of earnestness in his objections. For once, however—and it was altogether unusual to her—Maurie was obstinate, and the little god lay wrapped up in her arms as they walked down to the river.

On the shore, when they embarked, two of three Burmese watched them, seeming to pay particular attention to Maurie. Presently they were joined by others, who talked and gesticulated excitedly.

"One would think they knew what you've stolen," said Verulam, in low tones.

"How could they?" his wife whispered back. "Besides I haven't stolen it. I've given them plenty for it."

Some slight delay occurred in the starting of the launch, and it certainly seemed as though a hostile feeling was spreading through the groups that had assembled, as if by magic, along the river bank.

At last a Burmese woman, step-natives near the boat, looked straight at Mrs. Verulam and said angrily:

"You had better return. There is something you must leave with us."

Maurie glanced inquiringly at her husband, doubtful as to what she should do, but at that moment the launch began to move and shot swiftly up-stream.

"Too late—" said the Major laconically. Already the distance made it impossible to toss the Buddha across the stream; there was nothing to be done!

"I'm very sorry I took it now," murmured Mrs. Verulam. "But perhaps they won't mind when they find the money. And perhaps it wasn't the god they wanted at all."

Time went on, and she kept the little image, but every now and again, like a transient shadow,

the thought would cross Mrs. Verulam's mind that things had not gone well with them since that day on the Burmese hill. Major Verulam was sent up to a hill fort on the north-west frontier of India almost immediately after their return from Burma, and though his wife went with him willingly enough she found that things were dull compared to their life in the bright and friendly community they had left, where everybody made a fuss of the good looking young couple.

Time hung heavily on her hands, and she grew listless and out of sorts, while Verulam, secretly much concerned about her, wondered whether life in the East agreed with her.

And then one day, the tragedy happened.

A new C.O. was to arrive at the fort, and Verulam rode out to meet him on horseback, with other officers.

There had been some hints of trouble on the frontier, and rumours or discontent floating about.

Having met the new Colonel, Verulam was on his way back with him. One of the fits of depression that had haunted him lately swept over him, and he lagged a little behind the rest of the cavalcade, gazing abstractedly ahead. Suddenly his eye caught a suspicious movement in a nullah near the road.

Instantly his senses leaned to alertness.

"Look out, sir!" he called to the Colonel, and spurred his horse (Continued on page six)

Customer: "Will these shoes wear long?"

Clerk: "Wear long? Why sir, nobody ever yet came back for the second pair."

LOCAL TIME TABLE

No. 1—Westbound.

Does not stop for westbound passengers. Intending passengers must go forward on No. 3 and transfer at a divisional point.
Arrives Chauvin 5.50 p.m.
Arrives Irma 7.37 p.m.

No. 2—Eastbound

Only stops on flag for passengers going east of Winnipeg.
Arrives Irma 10.18 a.m.
Arrives Chauvin 11.58 a.m.

A CORRECTION

In our local note about Capt. Clifford Bisset last week we made two errors. He was selected out of three hundred and eighty students who wrote on the CIVIL Service Commission Exams.

Buy old flour, it is better than new. Saker's have for this month two carloads and it will pay you to get it now.

MR. A. TAYLOR

SEVERELY BURNED
ON FACE AND HANDS

Whilst filling his car with gasoline on Saturday evening last, Alec Taylor was badly burned about the face and neck, and both hands by the fumes of the gas reaching a lantern which was close by and exploding.

Peter P. Rusk who was in the garage at the time promptly covered Mr. Taylor with a leather jacket which he was wearing, extinguishing the flames in his clothing, thus saving him from more extensive burns.

The garage which had caught fire and the car were completely destroyed. One of the Nysetvold Bros observing the fire from his home, hastened over to render assistance, and brought Alec in

to town, where he was attended by Dr. Folkins. We are pleased to report that Alec is making satisfactory progress.

The danger of leaving undesirable things in the reach of children was emphasised when the baby child of Fred Dallyn came near to losing its life through eating ten aspirin tablets which it had in some way got in its possession.

Cheaper than you can make them. Sweet biscuits 30c per lb at Saker's. Fresh stock, a fine variety.

Parkers Dufold Fountain Pens—The big red fellow, needs no introduction.

McKechie's Drug & Stationery

There are no better apples than MacIntosh Reds—The reliable O. K brand for sale at Saker's. When in doubt get it at Saker's.

Be sure to come and see the Radio and Death Ray, latest Paramount Picture. Next Monday at Chauvin, and Tuesday at Edgerton.

TAKE NOTICE

Take notice: That the S. W. Quarter of Section 19, Township 43, Range 1, West of the 44th Meridian, adjoining farm now occupied by Cahill family, will be leased for Thirty Dollars (\$30.00) cash and keeping up fences throughout from now on until April 1st 1925. Applying without delay to Mrs. Dr. Keane General Delivery, Edmonton. Main P. O. and enclosing the Thirty Dollars.

Train 300 Miles Long to Carry Crop

(Right)—Thrashing time on the prairie. (Left)—Freight trains in readiness at Winnipeg for immediate service. (Bottom)—A grain elevator at Montreal.

Stationed at the Transcona yards, Winnipeg, and at strategic points throughout the Prairie Provinces, the Canadian Pacific Railway has 35,000 boxcars standing ready for the transportation of the 1925 crop. Of these over 8,000 cars are at the Winnipeg yards. To move this immense aggregation 650 freight and 150 switch engines will be required.

Were they all to be joined up into one train and if we further suppose that this train were moving at twenty miles an hour over a level crossing, a motorist who arrived there just as the first engine reached the crossing, would have to wait fifteen hours until the caboose passed across. This would indeed be a case where "taking a chance" would almost be justified.

Each boxcar is from 36 to 40 feet in length or an average of 38 feet. Allowing a space between each of four feet and taking into consideration also the 650 engines each ninety feet long, the total length of this great train would be about 290 miles which at twenty miles an hour would take close on fifteen hours to pass a given point.

The carrying capacity of a boxcar is about 1,500 bushels of wheat and this would take care on the first movement of the above imaginary train of 52,500,000 bushels. Since the train in its individual movements will travel several times, an idea of what proportion of the 1925 crop, estimated at 375,000,000 bushels the Canadian Pacific Railway will carry, is indicated.

Among the engines used in the hauling of the wheat trains are some of the most powerful in the world. Reckoning in the weight of coal carried, the heaviest of these engines weighs about 380,000 lbs. while the boxcar, loaded with grain, weighs 140,000 lbs. The average grain train is composed of forty boxcars, so the weight is about 6,000,000 lbs. or 3,000 tons. The total number of such trains would be 875 which would give a total weight of 2,625,000 tons.

Cutting of the crop is already under way and movement of the grain will commence about the end of August and will continue until the close of navigation on the Great Lakes which is generally between the 10 and 15 December. During the banner crop year of 1923, the Canadian Pacific Railway operated in connection with the movement of the grain approximately 5144 trains and 25,720 men were required to handle the traffic. In that year the Canadian Pacific Railway moved 220,000,000 bushels.

LOCAL NOTES OF INTEREST

erated on for appendicitis. and is reported to be making satisfactory progress.

Capt. Benjult of Calgary was at Chauvin inspecting "C" Squadron 19th Alberta Dragoons. He reported everything to be satisfactory.

The Same Lines as Before

H. N. FREEMAN, Manager

CHAUVIN, Alberta

On Monday Dr. Folkins was called to attend the baby child of Fred Dallyn, of Ribstone. who had in some way got possession of Aspirin tablets and is supposed to have eaten ten of them. From latest reports the child is doing well.

The dance given by the Basket ball girls on Friday evening last proved a very successful event. A large crowd attended and everybody reported having had a good time. From the proceeds the girls were able to clear up the residue of their expenses and create a reserve.

CARD OF THANKS

The Chauvin Basketball Girls wish to heartily thank all those who contributed to the success of their dance. Especially those who gave donations toward the supper and supplied music.

Chauvin Basketball Girls.

Fly Tox for Fall Flies. They fall fast. 8 oz. bottle 50c; 16 oz. bottle 75c.; small sprayer free; large sprayer 50c.

McKechnie's Drug & Stationery

A STORY WITHOUT A NAME

The famous Paramount Picture "A Story Without a Name", featuring Agnes Ayres and Antonio Moreno upported bp an All Star Cast. A story of gripping interest. A picture you should not fail to see. To be shown on Monday next at Chauvin and Edgerton on Tuesday.

10 lb jar of pure White Clover Honey at Saker's for 1.85.

NEW MILLING PLANT

Contruction on the completion of Calgary's new milling plant being built by Spillers of England, has been started. and the plant will be ready to handle the crop of 1926. The completion of the plant will cost \$300,000 and there will be \$2,000,000 in machinery.

PELICAN BRIEFS

Threshing proceeds slowly in this district owing to inclement weather. The yield is fair.

Oh, it's four o'clock in the morning now. Har, Har! Tommy

The Edgerton road to the Battle river bridge in the district has been greatly improved under the able leadership of foreman Robt. Nickle. We cordially invite all non-residents to visit our locality and note the change.

Mrs. Murray, local pedagogue. has moved to the premises of Wm. Thorpe. All communications should be addressed there.

Pop goes the weasel—we mean Pickard's engine. The little bed-bug has no wings but it gets there

just the same, Aleck.

Bailiff George Miles weilds a wicked horse shoe these iron days.

Whilst grading the Battle River valley recently Aleck Pickard slid suddenly from his seat and narrowly escaped the blade. As all was quite smooth and serene at the time. Foreman Nickle naturally suspected a Santa Barbara California aftermath.

Mr. Bud Haddix, of Flint, Michigan, U.S.A. and formerly of Edgerton is renewing old friendships at the Thomas home. Bud reports conditions down there as being A. I. Oh. yes—We almost forgot somebody—Eh, Norm?

Sorry to hear of Mr. Nickle's accident and hope he is O. K. again.

We regret to learn of the untimely death of our late esteemed editor. We understood he was improved and his end came as a distinct shock. His was a genial personality, whole souled and kind hearted and was greatly interested in his work and the community life about him.

He represented a type of citizenship sorely needed in this trying hour but unfortunately rare. Our deepest sympathy and best wishes are extended to Mrs. D'Albertanson, Mother, and family in their sad loss.

10 lb Lily White Syrup at Saker's for \$1.00.

A Saker special for the week end, 10 lbs of Sun-Maid Sultana Raisins for \$1.20.

Motor Ether makes your car or threshing engine start easily on cold mornings. 95c per can McKechnie's Drug & Stationery

NOTES FROM THE NORTH EAST

"Curly" Ungent has disposed of the Pool Room at Marsden. this time to Elmer Natress.

The "Mitchell" Orchestra are the musicians at a dance to take place in the spacious barn of Mr. P. M. Chapman on Friday evening next.

By the way. Mr. Chapman has rented his farm to Mr.Christophersen of Waseca, and proposes holding a sale on the 22nd. of October next.

The threshing was sadly interrupted last week by the weather. but those who are threshed report good yields. 21, 24, 25, and 27 bushels are four reports received by the writer.

What might have proved a very serious accident occurred on the A. S. Lavold threshing outfit. Cyril King receiving a nasty kick on the shoulder from one of the horses. We are all glad to hear he is recovering nicely.

The local "shootists" report good sport with the gun these days.

The Progressive convention is billed for Battleford on Saturday next, the 26th inst. We understand that T. H. McConica. M.P. is again a candidate.

How did the meeting held at

Unwin regarding the proposed Co-operative Store turn out? Shall be pleased to hear details.

SPECIAL HARVEST SERVICE HELD AT THE SHERLOCK LAKE SCHOOL

A special service was held in the new Sherlock Lake school on Sunday last. The school had been decorated with flowers. vegetables and sheaves. There was a joyable service was held. Mrs. Keith was in excellent voice, and Mrs. McNutt capably presided at the organ. Suitable hymns were sung and an harvest address given by Mr. J. H. Webster of Emmanuel Colls. Saskatoon.

C. N. R. WILL BUY PRODUCT OF B. P. 3b

(Continued from page one)
were also considered.

Another well may be drilled near No. 3B this fall, although that is not definitely settled yet, said Mr. Sugars. If the well is not put down by the B. P. company, it may be drilled by a subsidiary concern

Large Shareholder Is Pleased
Full satisfaction with the field was expressed by one of the shareholders from Ireland, in the person of Lieut. Col. C. R. Kilkelly. who was recently at Wainwright.

There is no doubt about there being a huge supply of fuel oil in the Wainwright field, and it compares very favorably with what can be produced in Montana. declares the director.

B. of T. Council Reports
Members of the council of the Edmonton Board of Trade. who visited British Petroleum well No. 3B on August 26 have now

made the following report to the board:

"That on visiting Well No. 3B of the British Petroleum, Limited, we found the well being pumped. and from the oil in the earthern pit still showing gas bubbles on the surface it would appear to have been pumping for some time. We were informed by the drilling staff that it had been pumping for between three and four hours. The pit, which was about five feet deep, about fifteen feet wide and twenty-five feet long, was full almost to overflowing, and a number of tanks which were standing around had already been filled during the same period.

"We were informed by the head driller that the well had also maintained a level of 500 feet of oil under the pumping.

42-Gal. Bl. Fills in Three Minutes

"After luncheon we returned to the well and a forty-two gallon barrel was placed under the spout. the barrel was filled in three minutes. or at the rate of better than 480 barrels per day of twenty-four hours.

"The driller stated that the well will not maintain that flow if pumped continuously, but after making a forty-eight hour test they have placed their estimate of the average capacity of Sunburst field." the well at least 100 barrels per day of twenty-four hours for a continuous operation.

"Dr. J. A. Allan, provincial geologist, who accompanied the party, stated that the oil was of commercial value and that the crude oil of the field has been shown to be a greater producing average than that given in the Sunburst field.

Sat., Sept. 26th

Miss. M. E. Donovan, of the Women's Specialty Shop, Wainwright will be here with a beautiful selection of Coats Dresses and Millinery. This is your opportunity to secure the most up-to-dates of this seasons fashions and the values are the best the market has to offer

FORD COMPANY LTD. ANNOUNCE NEW MODELS

Body changes and Chassis refinements fore pronounced than any made since the adoption of nounced on August 29th by the Ford Motor Company of Canada, Limited. There will be no advance in price.

It also was stated outstanding features of the improvements in both Open and Enclosed types are:

Lower all Steel Bodies on a lower Chassis. Complete new design in most types. A change from black to color in Closed Cars. Larger lower fenders. Newly designed seats. Longer lines effected. Though higher radiator and redesigned cowl bodies are apparent in all improved Ford Cars, they are especially pronounced in the Open types. Wide crown fenders hung close to the wheels contribute to the general effect of lowness and smartness. While runabout and Touring Car remain in black the Closed Bodies are finished in colors. The Coupe is in grey.

Greater comfort is provided for Driver and Passengers in both Open and Closed cars by larger compartments, more deeply cushioned seats and greater leg room.

Many new conveniences are also incorporated in the improved cars. In all motors except Truck the gasoline tank is under the cowl and filled through an ingeniously located filler cap completely hidden from sight by a

cover similar in appearance to a cowl ventilator.

One piece windshield and narrowed pillars in the Tudor and Coupe offer the Driver greatly increased visibility and improved ventilation. Driving comfort is seats, scientifically improved back rests and lower steering wheel Brake and Clutch pedals are wider and more conveniently spaced. Curtains of Open Cars are held secure by rods which open with the doors.

At the main offices of the Company in Ford City it was stated today that production of the new line is under way in all Assembly Plants of the Company throughout the country and the improved cars are being sent to Dealers for showing.

"THIS WAY PLEASE!"

An Irishwoman walked into a big stores and a shopwalker who was very bow-legged asked what he could do for her. She said she would like to look at some handkerchiefs.

"Just walk this way, madam," said the shopwalker.

The old lady looked at his legs. "No, sorr," she replied, indignantly: "I couldn't if I tried."

Child: "Papa, what is a king? Papa: "A king, my child, is a person whose authority is practically unlimited, whose word is law, and whom everybody must obey."

"Papa, is mamma a king?"

THE BURMESE BUDDHA

(Continued from page three)

sharply forward just in time to cover the C.O.'s body with his own. A second later a rifle roared alongside the road and poor Verulam received the fatal charge intended for his superior officer.

For an instant he swayed in his saddle; then he fell headlong to the ground, his lungs riddled with a mass of shot and slugs.

The mad ghai who had fired the shot gave a yell of triumph and ran for cover in the scrub. but was promptly pursued and caught by some of the gunners. They brought him into the fort venomously jubilant at having bought his place in paradise with the life of an English officer, thus fulfilling the commands laid upon him by a mullah whose crusade against British authority was ceaselessly virulent.

Verulam was carried in unconscious and died before the night was over, with his wife kneeling at his side, her hands clasping his her face set in mute despair.

They sent her down to the plains two days later, and when her baby son came, the consolation she had longed for was denied to her, for he speedily faded away and died and was laid to rest under an Eastern sky. The heart-broken young mother journeyed home to find a home with her husband's people.

The little Buddha had long since been forgotten, and when one day, unpacking a box that held some of her husband's personal things, she came upon it. she stared at it in amazement.

"The Gotama!" she exclaimed under her breath. "Why is it among Lance's things? Did he take it so as to avert bad luck from me?"

She pushed the little god away from her as though it was a thing of evil.

"What shall I do?" she asked herself. "I wish I had never taken it! Oh, Buddha! it's too late now to beg you to forgive me and be kind to me—I can't get my darling back!"

The idea that the figure had in on her refused to leave her. Indeed it grew daily; and she dared not destroy the image nor part with it.

Finally she carried it down to the garden and found for it a niche in a corner of an old wall with its face to the sun.

As time went on she began to forget it again, and to think that chance and coincidence only had linked it with the tragic incidents of her widowhood.

Her memory of Lance, too, reverent and tender always, merged into the sanctity of the past, enshrined in her inmost heart, but no longer embittering her present.

Gradually a new interest dawned for her in the person of the curate in charge of the parish, who gained first her friendship and then, after a while, a stronger sentiment that was on the fringe of love.

Hartley Vane was one of those muscular Christians who are veritable pillars of the Church they serve. The parishioners recognized his manly qualities, his dominating influence for good, his real care for them, spiritually and physically. It was a blow to everyone when he was called elsewhere for special duty as chaplain to a hospital.

The day before he left he came to say good-bye to Mrs. Verulam, and found her in the garden sitting in the shade of a syringa bush near the house.

Her cry of surprise when he told her his news, her sudden blush, her averted eyes, brought to light a latent hope that he had hardly dared to cherish. He took her hand impulsively.

"Maurie" he said, "when I come back, may I tell you what my dearest wish in life is—what you are to me? Will you wait for me?"

She lifted a troubled gaze to his.

"I didn't think I should ever care to hear what any man thought of me again," she murmured. "Yes; I will wait, Harley."

"My dearest heart," he whispered. "I shall pray to come back to you soon."

There was a little stir amongst the blossoms, and something fell on the grass at their feet. Vane picked it up wonderingly.

"A little Indian god! "it looks like Buddha."

Quickly Mrs. Verulam took it from him.

"I wish you hadn't touched it!" she said. "It brings misfortune. I brought it away from Burma."

He smiled at her agitation. "I have no faith in superstitions of that kind," he told her. "If you have, possibly it may influence you. Give it to me; I'll take it with me and keep it on my table as a remembrance of you."

Mrs. Verulam demurred, but at last she yielded, and Vane wrapped it up and took it away with him.

It was only a month later—after Mauricia had read with glowing happiness a letter from him—that the sorrowful news came. Harley Vane had caught spotted fever from a patient in the hospital and had died in a few hours.

The little personal belongings that had stood on his writing table were sent to her, in accordance with a wish he had expressed before his death. And amongst them came the Buddha!

Mrs. Verulam fainted when she saw it, and the swoon was the prelude to a long illness.

During her bouts of fever she spoke often of the little god, imploring him to lift the spell and avert further suffering.

Weeks of slow and tardy convalescence followed, but, curiously enough she never mentioned

either the Buddha or the two men who had gone out of her life. During this interval the little image disappeared, no one knew how or where. Perhaps the Doctor had something to do with it!

Gradually peace returned to her troubled mind, and the light of youth and hope to her face. It was the "Maurie" of old times who met one day a man who had known and admired her long before she married Lance Verulam. The renewed association developed quickly into a deep attachment, and now she has learnt the secret of happiness once more in an English home of her own.

She has a feeling, she told me once, that far away on a Burmese hillside the little Buddha gazes from a ruined shrine towards the West, his eyes tranquil, his face benign, his inscrutable lips still guarding his secret for all time.

MANY AUTOS REGISTERED

More than 52,000 cars are operating in Alberta this year, compared with something over 47,000 in 1924. The total receipts from car licenses thus far this year have \$845,000 for the entire year of 1924.

THE "TAKE-ALL" DISEASE OF WHEAT IN WESTERN CANADA

(Experimental Farms Note)

An extensive survey made this year by the Dominion Laboratory discovered the disease take-all of wheat in many wheat fields in northeastern Saskatchewan. The disease varied in severity, many fields being free or showing only a trace and others showing ten to fifty per cent of diseased plants. It was also found in wheat fields not far from Edmonton and has recently been reported from northern Manitoba. As far as is known at present the take-all disease is confined to the park country, only traces being found in the prairie regions.

The disease is caused by a fungus which attacks only the underground parts of grasses and wheat. The young plants may be killed or the injury to the roots or base of the stem cause the plants to be stunted. The disease is most easily noticed at the time the healthy wheat plants begin to ripen. It usually occurs in spots where the plants are much stunted and of a pale white color, while the healthy plants are green. The heads are small and the kernels are absent or much shrivelled. As many of the wheat seedlings have been killed in the early stage, the wheat is thin in the diseased spots. There may be many of these spots in a field. The diseased wheat is easily pulled out as the roots and base of

the stem is decayed. The lower part of the stem at or just below the surface of the ground is dark or black in color. This dark color is usually best seen by pulling away the sheath. Sometimes dark spore cases may be seen attached to the sheath or roots.

While the disease is serious, there is no need for alarm. From all the evidence obtained, it seems the disease is present on native grasses, and when the land is broken it passes to the wheat through the soil. There is no spread from plant to plant in the air, as in the case of rust. Infection takes place only through the soil, so that the spread from field to field, except by soil or stubble transfer, is not probable.

From work done in Australia and observations in Saskatchewan, the following suggestions for the prevention of the disease are made: 1. Burn the stubble on the diseased spots; placing some dry straw on the spots would help in this. The burning destroys the mycelium and spores on the stubble at the surface of the ground. 2. Avoid grasses in rotation in diseased fields; they harbor the disease in their roots. 3. Summer-fallowing will probably lessen the disease, but grasses must not be allowed to grow in the summer-fallow. 4. Use resistant crops such as oats, flax, potatoes, and sunflowers in rotation. Rye and barley are attacked but not so severely as wheat. Such measures if carefully followed will lessen the disease and prob-

ably cause it to disappear or become of little importance. (Specimens from diseased spots may be sent to the Dominion Laboratory of Plant Pathology at Saskatoon for determination.)

EXPERIMENTAL

FARM NOTES

During the growing season of 1925 there were a total of eight previously arranged excursions to the Scott Experimental Farm with a total estimated attendance of 2500 people. The Annual Grain Growers picnic held on July 15 was attended by approximately 2000 people, the other organized visits were chiefly agricultural societies from different points making the trip by car and returned the same day. Tours were made over the Farm and the experimental work was discussed and explained in detail. A marked interest was shown in crop rotations, cereal variety tests, horticulture, livestock and poultry.

In addition to these organized visits a great many came when convenient in small parties without any previous arrangements and as far as possible were shown the work underway in which they were especially interested. Tourists interested in experimental work often make Scott a stopping place for lunch or over night.

The exhibit from the Scott Farm was displayed at six agricultural fairs during July and August 1925; the object being to give people who have not visited the Experimental Farm an idea of the work being conducted for their benefit and to induce them to make use of the available experimental results.

THE FARM'S THE PLACE FOR A' THAT

The thresher needs a limousine,
To run around and a' that;
The farmer has to foot the bill,
And smile the while for a' that.
For a' that and a' that,
In spite of cars and a' that,
The thresher lives an anxious life
The farmer's free for a' that.
The thresher works fra sun till sun

But asks a sleep for a' that:
The farmer's wife ne'er sleeps a wink

And has to work for a' that.
For a' that and a' that,
In spite of work and a' that,
The farmer's wife, though e'er sae tired,

Is Queen of wives for a' that.
The thresher needs the best of food

To keep him fit and a' that,
The farmer's kids devour the bits
And till them fu' for a' that.
For a' that and a' that

In spite of grub and a' that
The farmer's kids are healthy kids

And fu' of life for a' that.
Th thresher's pockets bulge wi' gold

And bills and liens and a' that:
A pouch the farmer's share will hold—

He has to live for a' that.
For a' that and a' that,

In spite of debts and a' that,
He keeps a roof above his head.
—Exchange.

"Jones tells me he never destroys a receipted bill."

"No; he's more likely to have them framed, and hung up in his parlor as curiosities.

U. G. G. TO PAY PATRONAGE DIVIDENDS

Under the new Grain Act, the United Grain Growers are now permitted to pay to their customers a Patronage Dividend effective September 1st, 1925. Dividend receipts are now being issued with each cash ticket for all loads of grain sold at the regular street list price. At the end of the season and after the payment of the usual dividend on shares the Company will distribute all surplus profits among the customers who sold their grain by the load, in amounts proportionate with the number of bushels of grain sold in this manner. This includes all grains but not pool wheat.

They were discussing the absent of their baby sister, but neither could give a satisfactory explanation of the new arrival.

At last the elder boy said: "I know how it was."

"How," asked his brother.

"Why, God said: 'Let there be Phyllis,' and there was Phyllis."

The first sign of summer is when you wish it was winter again.

TO DEMONSTRATE WEED CLEANER

The provincial department of agriculture, which is undertaking to manufacture for marketing the Stephen grain cleaning attachment for separators, will make a demonstration of the improved machine at Calgary, Lethbridge and Claresholm in the near future. The demonstration at Calgary will take place toward the end of the next week in the vicinity of Shepard. A further announcement concerning this will be made. The machine has recently been considerably improved and is considered modern in every respect.

The deepest spot in the Atlantic is 27,967 ft. What an excellent place to drop a saxophone overboard.

A magistrate remarked the other day that although he had never tried a cocktail in his life, he had often tried those who had tried them.

"I told your father that I just dote on you."

"And what did he say?"

"That I had better find an antidote."

CHAUVIN,

ALBERTA

HISTORY OF NATURAL
GAS INDUSTRY SINCE
DISCOVERY TO PRESENT

(Continued from page one)

tion, when folks were easily mystified and terrified by unusuals in Greece, one summer afternoon, a shepherd tending his flock of goats, noticed that some of them wandered about in an unusual fashion when they came near to a certain spot and, upon investigation, he became affected also, had a feeling of light-headedness caused by something which seemed to come out of the ground. Gathering the villagers to the spot, they were amazed, they also had the same experience, became talkative and light-headed, and it was agreed that they were in the presence of a super-natural agency and they appointed a priestess to communicate with the God and built a temple where persons might go for advice. Thus the Oracle of Delphi became famous.

Dr. I. C. White, state geologist of West Virginia, and an internationally known scientist, mentions that in his travels through Asiatic Russia he saw the remains of gas wells that had been used in the temples of the fire worshippers at Baku. The Chinese are said to have utilized natural gas, discovering it during the period of the Chinese development which later deteriorated and had piped it through tubes of bamboo for lighting.

Modern history records the first successful gas lighting as having been done on the occasion of the signing of the Peace of Amiens and the celebration of the peace between France, Holland and Spain. April of 1802, when a public display of the new light was made, which attracted wide attention and comment. This was at Birmingham.

The first gas tip came by accident. Murdock, in desiring to stop the flow of gas which was

burning from an open tube, put a thimble over the end of the tube, but, it was an old thimble and had been pierced in numerous places, and the gas, coming through the holes in smaller volume, brought into contact with a greater proportion of air, gave a much better light.

So, the Goddess of Chance has been a big factor in the gas industry as a whole, and particularly in the natural gas industry.

Notwithstanding the generally accepted belief that the first gas well on this continent was at Fredonia, New York, in 1824, we have it on the best authority that the first gas well of which we have any record was struck in 1820, on the south bank of the limits of the city of Pittsburgh. The proprietors of a salt works, drilled the well to increase their supply of salt water and tapped a flow of gas, which caught fire and caused the destruction of all the buildings. The owners were greatly rejoiced when they succeeded in plugging the well and shutting off the flow of something they considered as a little less than Satanic.

Then came the discovery, by chance, of the first natural gas at Fredonia, New York, in 1821. Some small boys were instructed by their parents to quench the embers of an oven in their backyard, in which the mother had been baking bread, and in a playful manner, they began throwing blazing sticks across a small stream. One of them noticed that when a lighted stick lit near a certain spot, a flame would issue. The attention of the parents was called to this and, upon investigation, they found coming from the ground a small volume of gas which could be ignited. Of course, the product was unknown, but with true American enterprise, they immediately began to dig a well and put down a hole some six or seven feet in diameter and 20 feet deep over which they put a tin roof,

and from it a pipe to the house. Later when Lafayette visited Fredonia and found "The Inn" (Taylor House) using gas coming from a mysterious underground source, he remarked that he had better get out of such a place, as it was evidently too near to hell.

Gas was found along Lake Erie, at Westfield, New York, in the bed of a creek. In 1828-29, some ingenious parties made a contract with the United States government to supply the lighthouse at the Barcelona harbor with this gas. Using a fish barrel for a gasometer, they sealed it over a gas spring; then, constructed of pine logs, a pipe line one-half mile long, running to the base of the lighthouse from which the gas was conveyed to the summit of an ordinary lead pipe. They were able to supply more gas than was required for the consumption of 144 burners, furnishing a bright and steady light to this lighthouse for over 26 years.

The first natural gas corporation in the United States was the Fredonia Gas, Light and Water Works company, which was organized in 1865, and it was at this time that the real domestic use of natural gas began.

In 1865, natural gas was used as fuel in twelve houses in Oil City. The first long distance iron gas pipe in the United States was a two foot gas line, capable of delivering four million feet of gas, from the Newton well to Titusville, Pennsylvania. This line was completed August 1, 1872.

The first use of natural gas in the pottery industry was at East Liverpool, Ohio, in the early seventies. In 1873, Edwin C. Bell discovered that gasoline could be recovered from natural gas by compression.

The first industrial use of natural gas was in the manufacture of iron and steel at Leechburg, Armstrong county, Pennsylvania, in 1874.

Then we come to the great Indiana gas field. In the early

eighties, a new railroad bridge was built across the Mississinewa river, near Eton, ten miles north of Muncie, in excavating for the abutment, a strange gaseous odor was noticed, which indicated the presence of natural gas. In the autumn of 1886, the first well was completed, and at a depth of over 900 feet, they had a nice gas well. Great interest was aroused and drilling was started all over central Indiana. Over 7,000 square miles of proven territory was developed, and for years an enormous supply of natural gas was produced in what is known as "The Gas Belt" of Indiana.

In 1887, in a lecture before a German Engineering society, Kurt Sorge gave a most interesting account of natural gas as produced and used in Pittsburgh and vicinity. He called it a most important factor in the iron industry, said that no one who had not seen it in use could have an idea of the mighty potency of this gassy outpouring of the earth, which we called "natural gas". He said at first, in his visits to various plants, he was awed by the seeming perfection in the use of fuels, but he soon learned that perfection in use was due entirely to the ideal perfection of the fuel used, and further said, "The novelty of the fuel consists in its potency, its extensive application and multifarious utility."

From the earliest records available in the States we find the following information—the value of the gas produced was as follows: 1882 (approx.) .. \$ 275,000.00 1900 23,698,674.00 1906 46,873,932.00 1916 120,227,468.00 1921 174,617,000.00 1922 221,535,000.00 1923 239,961,000.00

In 1923 the total production was 1,008,135 million cubic feet. Of this amount 3,232,800 domestic consumers took 278,209,000 million cubic feet at an average price of 51.1 cents per million, and 720,917,000 million cubic feet was taken by approximately 18,000 industrial consumers. This brings us pretty well up to the remarkable industry of producing, transporting and marketing natural gas.

To know what we have and what we can do with it—and what we should do with it, also—is a policy of wisdom, a policy of lasting progress. And in furtherance of such a policy, the first step is to know our resources—our natural wealth in things and in their possibilities; the second step is to know their availability for immediate use; the third step is to guard them against waste either through ignorance or wantonness; and the fourth step is to prolong their life by invention and discovery.

Free—A can of Palmolive after having Talqum powder with a purchase of a tube of Palmolive shaving cream at the regular price of 35c, McKechnie's Drug & Stationery

"Radio and Death Ray," features in the latest Paramount production "A Story Without a Name," A masterpiece of screen pictures, and one that you will enjoy. Next Monday at Chauvin, and Tuesday at Edgerton.

"Does your wife pick all your suits for you?" "Just the pockets."
